PROFILE SUMMARY

- Technical Specialist with over 19+ years including 4.7 years in AWS Cloud & DevOps; experienced in IT infrastructure & operations, networking, IT operations, risk mitigation, crisis management leadership to accelerate growth & gain competitive edge
- Expertise in DevOps practices and processes that are intended to speed up and automate aspects of the processes of developing, testing and releasing software, allowing for continuous delivery of software & software updates, thereby saving time & manpower
- Completed Advance certification in cloud computing and devops 12 months course conducted by IIT Roorke with Intellipaat
- Demonstrating key skills and competencies in networking, IT operations, risk mitigation, and crisis management leadership, contributing to strategic changes and elevating performance levels in technology infrastructure.
- proficient in CI (Continuous Integration) and CD (Continuous Deployment) methodologies; technical expertise in DevOps tools such as Git & Github, Maven, Jenkins, Ansible, Docker, Terraform, Kubernetes, Shell Scripting, Linux, ArgoCd
- Delivery Anchor with career success in delivering solutions that remedy core business issues and position the organization to reach the next level of profitability through technology introduction
- Interacted with clients/users for following up on unresolved issues, analyzed & resolved problems within defined TATs; exceeding quality of service commitments within set SLA

EDUCATION

Bachelor of Science in Mathematics:
From Shobhit University - Merrut U.P in 2015

CERTIFICATIONS

Advanced Certification in Cloud Computing & DevOps conducted by IIT Roorke in association with Intellipaat
AWS Certified solutions Architect - Associate
Microsoft Certified Azure cloud Administrator AZ- 104

CORE COMPETENCIES

	Devops Engineering
	Strategic IT Planning
	IT Budget & Cost Optimization
	IT Roadmap & Governance
	Software Development
	Network Operations Management
	Technical Support/ Root Cause Analysis
	IT Governance & Compliance
	Risk Management
	Team Building & Leadership

WORK EXPERIENCE

Persistent Noida AWS & Devops Engineer | Since Feb'2025 to Aug 2025

Pyroll – Nr Consulting, Gurgaon

Responsibilities:

- Design and manage scalable, reliable, and secure AWS infrastructure.
- Work with services like EC2, S3, RDS, Lambda, VPC, CloudFront, Route 53, Glue, EventBridge.
- Set up and manage VPCs, subnets, route tables, NAT gateways, VPNs, and security groups.
- Build serverless applications using Lambda, API Gateway, DynamoDB.
- Provision and monitor databases like RDS, Aurora, DynamoDB.
- Define and manage IAM roles, policies, and permissions for secure access.
- Utilizing **Jenkins and Ansible** tools for efficient IT infrastructure management and software installation, streamlining processes and reducing manual intervention
- Leading and executing a diverse portfolio of projects, encompassing budgeting, planning, and vendor selection, ensuring timely completion and desired outcomes

Almansouryah Company, Al Qassim Saudi Arab as DevOps Engineer | Since Jan'2021 to Feb 2025

Responsibilities:

- Proficient in cloud and DevOps, with expertise in AWS Cloud services including EC2, VPC, S3, EBS, EFS, RDS, Load Balancer, CloudWatch, CloudFront, Security Groups, Auto Scaling, ECS Container, Route 53, and DNS etc.
- Enhanced code quality and accelerated development cycles by implementing CI/CD pipeline with **jenkins**, automated testing and continuous integration.
- Developed **one-click deployment processes**, to automate the provisioning and deployment of infrastructure and applications using terraform, including EC2, S3, VPC, networking, state management and AWS provider plugin.
- Created Ansible playbooks for task automation and managed Kubernetes clusters, improving deployment efficiency and scalability
- Implemented **monitoring alert systems** for application health tracking, rollbacks and proficient in metrics Analysis.
- Optimized code maintenance processes by integrating **Git/GitHub**, for repository management and implementing Infrastructure as code with **yaml, dockerfiles, ansible playbooks, kubernetes manifests**, reduced deployment time.
- Utilized ELK stack and CloudWatch for troubleshooting, health checks, and rollbacks, implementing alert systems with deep metrics analysis to ensure optimal uptime and performance and providing advanced visualization and insights into application performance.

Achievements:

- Successfully Java Application deploy to kubernetes clusters with Jenkins, Maven, docker, sonarqube, Argo cd and kubernetes
- Implemented IT infrastructure management best practices, leading to a 20% reduction in downtime incidents

System Administrator | Since Feb'2011 to Jan 2021

- Configure & Troubleshoot on services like DNS, DHCP and Active directory in Server 2003 Standard.
- Manage the Dell server Datacentre Domain Based Environment.
- Manage the Symantec Endpoint Protection Manager.
- Manage the all fortigate user (User creation, delete and policy).

Four Seasons Hospitality, Gurgaon as System Administrator | Jun'10-Feb'11

Responsibilities:

- Managed IBM x3400 server in a Windows 2008 domain-based environment, ensuring optimal performance and availability
- Troubleshoot IDS Hospitality software and performed weekly database backups, safeguarding critical business data
- Configured and troubleshoot services like DNS, DHCP, VPN, IIS, and print server, maintaining seamless network operations

Team Computers Pvt. Ltd., New Delhi as IT Systems Associate | Jul'06-Jun'10

Responsibilities:

- Handled calls and provided hardware, laptop, and server support for two projects, ensuring timely resolution of issues and minimal downtime
- Troubleshoot system-related issues and provided application support, maintaining smooth operations across the organization

TECHNICAL SKILLS

- **Aws Cloud | EC2 | VPC | Peering | Subnetting | AWS Storage | S3 bucket | ECR | ECS | EKS | Cloud watch | IAM | SNS | Elastic Load Balancer | Auto scaling | Route 53 | Zone Creation | Elastic Beanstalk | Cloud Formation | ArgoCd**

Deploy a Java based App Using Jenkins, Maven, SonarQube, ArgoCD with Kubernetes

- Jenkins Pipeline: Automating the entire CI/CD process..
- Java & Maven: Building and managing the application.
- SonarQube: Ensuring continuous code quality and analysis.
- Minikube (on EC2): Simulating a Kubernetes cluster on AWS for testing and development.
- Argo CD: Handling continuous delivery and deployment to Kubernetes.
- Kubernetes: Orchestrating containers for scalable deployments.
